Review

With the global economic recovery in 2011, the rapid growth of demand for textiles led to a steady increase in the production benefitting the nonwoven industry. According to the National Bureau of Statistics of China, from January to May in 2011, the nonwoven output totalled 659,400 tons, an increase of 13.93% over the previous year. Even with a conservative annual growth rate of 8%, the output will exceed 13 million tons by 2030.

“8th Asia Nonwoven Technology & Innovation Application Summit” has presented various abundant conference forms such as keynote speech, workshops, brainstorming and experts’ classroom. The summit involved the hottest application fields at present viz. Functional wipes and Facial mask. The forum has attracted over 100 industry experts and given all participants a new experience and ideas which would help them develop new application fields.
