## Research and statistics

show the global anti-aging market is expected to reach an estimated value of USD 191.7 billion in 2019, compared to USD 122.3 billion in 2013 with a CAGR of 7.8% from 2013 to 2019. The subject of anti-aging has thus aroused worldwide attention among governments, research institutes as well as multinational brand names. To date, researches on aging mechanisms, prevention and intervention measures have made significant achievement. Herbal-based and medicated cosmetics have also made a positive impact in the cosmeceutical industry. Numerous technological breakthroughs have given birth to innovative products, benefiting the beauty and personal care industry and the global economy as a whole.

With opportunities as well as challenges in the industry ahead, certain questions and topics prompt discussion; specifically, how to promote and regulate the industry in order to maintain a healthy, stable and sustainable development; how to strengthen technological exchanges and cooperation with the support of equipment and material suppliers; and how to facilitate more effective interaction between the beauty and personal care industry and the medical field.

The GLOBAL ANTI-AGING TECHNOLOGY SUMMIT 2014 & 7TH COSMECEUTICALS INNOVATION CONFERENCE feature world-renowned profiles in the beauty and personal care industry, including industry and corporate leaders, top marketing experts, chemists and researchers both from China and abroad. All gather under the same roof to discuss and exchange ideas on legislation and regulation issues, market trend, consumer safety concerns, as well as scientific solutions and technological breakthroughs. A series of case studies and success stories will be presented.

### Our commitment

- \*Topic that are essential to your business
- \*Networking with leaders in your industry
- \*Make at least 5 new valuable business contacts
- \*Take away at least 3 new ideas/applications/ technology that can have an impact on your business
- \* Access to all conference presentation materials
- \* 5 star quality environment & services
- \* Convenient transportation & centralized location
