

3D Printing Innovation Technology Exhibition 2015

Scan the QR code
for more information

March 12-13, 2015

The Longemont Shanghai

No.1116 West Yan'an Road,
The Longemont Shanghai
(near Fanyu Road)

Concurrent Event

Plastic& Rubber and Innovative Materials Application in Automobiles Conference 2015

Plastic& Rubber and Innovative Materials Application in Electronic Design Conference 2015

Plastic& Rubber and Innovative Materials Application in Medical Conference 2015

Industry Background

In recent years, 3D printing market developing rapidly. 3D printing markets value of \$2.2 billion in 2012 in worldwide. It is expected to reach \$7.24 billion in 2019. Meanwhile, China will be officially launched at least 10 3D printing innovation center in 3 years, develop 500 traditional enterprises into 3D printing industry alliance, which is expected to achieve output value of billions of yuan, ten times of the market in 3 years. Even one of the world's largest 3D printers producer Stratasys, Jonathan jia long, Asia Pacific managing director, said, "now, in 3D printing markets around the world, the fastest-growing markets is Asia region, the fastest growing market in Asia is China. Obviously, China is now the most rapid in 3D printing market in the world."

Meanwhile, 3D printing material is still need to be one of the development subject in 3D printing industry. Although material such as plastic, metal powder has been used, but more suitable innovation of 3D printing material is still the hot direction for the big developers. How to reduce the cost of materials, broaden the application field, will be continue to concern in 3D printing industry.

About Organization

More than 20 high level technical seminars each year, bringing together test, assessment, recommendation, procurement equipment, systems and key personnel from materials. High quality speaker and sponsors jointly create a valuable platform, exchange information and establish new business. Let us help you to plan custom meeting – promote by means of network marketing seminars and other digital media.

Reasons You Cannot Miss!

- The same time, focus on automotive, electronics and medical 3 applications
- The industry's top material supplier information release, accurately capture the development trend of 3 d printing materials
- 15 minutes' technical exchanges speech collocation, grasped more corporate communication and business chance
- 5-star hotel , build a perfect business and technical communication platform
- Buffet lunch and cocktail parties, relaxed and reduce the distance with the customer by diverse communication forms

Exhibition Info

Time:

March 12, 2015
(9:00-17:00)

March 13, 2015
(9:00-16:00)

Venue:

Floor4, The Longemont Shanghai

Exhibitors scope

(a) 3D printers

1. Industrial grade 3D printer, desktop 3D printers, and other 3D printing manufacturing equipment (rapid prototyping machines, rapid manufacturing equipment);

2. 3D printer accessories;

(b) 3D scanning and software

1. 3D scanner, 3D laser engraving machine, laser plate-making, laser equipment, 3D measuring instrument, three coordinates measuring machine/equipment, laser tracker, 3D camera, 3D laser machine;

2. 3D design system, motion capture system, three-dimensional photogrammetry system, CNC system

3. Inspection and reverse engineering software, 3D detection software, 3D design software, to popularize and apply printing software, etc.;

(c) 3D printing materials and technology

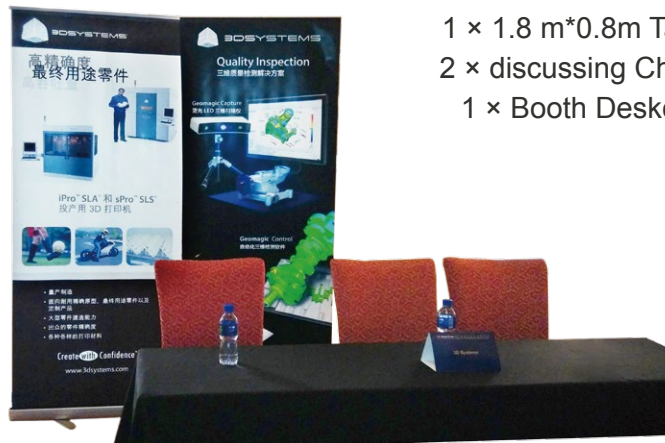

1. The photosensitive resin, plastic powder material (nylon, nylon bo qian, nylon, carbon fiber, nylon, aluminum powder, Peek materials, etc.), metal powder materials (steel, titanium alloy, titanium alloy and CoCrMo alloy, etc.)

2. 3D printing, other rapid prototyping technology, reverse engineering, surface treatment, etc.

Standard Exhibition Booth: 1,600USD (2m*2m)

Including:

- 2 × 2.0 m*0.8 m Roll Up
- 1 × 1.8 m*0.8m Table
- 2 × discussing Chairs
- 1 × Booth Deskcard

Service

Including 15 min' s presentation
(new product/technology/promotion ,etc)
