- ※ Examination of market and development trends
- ※ Nutricosmetics food ingredients
- ※ Male nutricosmetics food development
- ※ Production technology with quality inspection quality control
- ※ Application of academic research into product development

The term nutricosmetics refers to nutritional supplements that can support the functions and the structures of the skin. Nowadays skin care and beauty care are favorite topics not only for women but also for men. A high popularity of nutricosmetics leads to the boom in the industry. The 5th Nutricosmetics Innovation Conference will be held from November 20 to 21 2013 in Shanghai. It builds on the success of the previous functional food conferences and from there, this conference zooms into the specialized sub-categories of the industry. The nutricosmetics conference, in concurrent with the 6th Cosmeceuticals Innovation Conference, will present the "Beauty Care Inside and Out Summit 2013", to bring together networking and sharing of knowledge.

Audience:

- ☆ Beauty food enterprises
- ☆ Female health food enterprises
- ☆ Personal care products companies
