Advanced Technologies & Materials in High Demand in South East Asia

Vast opportunities in 3 fast-growing sectors

Three main sectors are currently posing high demand for innovative high-performance materials and breakthrough processing technologies in the ASEAN region.

The packaging sector accounts for about half of the total plastic consumption market in the ASEAN region. In the global packaging arena, Southeast Asia accounts for about 50% of the more than \$800 billion global packaging market. In Indonesia alone, the large consumer population of over 250 million creates huge demand for packaging. Companies engaged in packaging manufacture for multiple categories, thus demand for injection molded containers, PET bottle, flexible and rigid packaging, as well as new printing and labelling solutions is on the rise.

The region's automotive sector has been playing a key role in the overall growth of the plastics industry. ASEAN is one of the largest automotive markets in the world. Major vehicle and automotive parts manufacturers have chosen ASEAN countries as location for their production and assembly facilities. Thailand posts the highest automotive sales in the region with share of 44% while Indonesia is on second place with about 34% market share. Indonesia is currently the second largest automotive manufacturer in ASEAN.

Consumer electronics sales have seen dramatic rise in production output among countries in Southeast Asia. Computer hardware sales in Indonesia is expected to reach \$3.5 billion in 2020, from \$2.9 billion in 2016. Handset or mobile phones sales is seen rising to \$8.3 billion in 2020 from \$5 billion in 2016, up by 9.2% yearly. The current shift toward high-end consumer electronics, as well as the growing preference for energy-efficient, environment-friendly gadgets provide impetus for recent developments in breakthrough technologies and materials solutions.

Asia Plastics Processing Technology and Innovative Materials Summit 2017 in Jakarta, Indonesia (September 6-7) is a two-day event of informative presentations and discussions centered on innovative technologies and high-performance materials as applied in fast-growing sectors such as Packaging, Automotive and Consumer Electronics. The event gathers industry experts and professionals from the region in one venue where they can mingle, exchange ideas and expand their network and contacts. Lunches, receptions and cocktails are organized for delegates and industry experts to facilitate networking.

Learn from the experts! Be part of the action!

This exciting conference platform provides industry leaders and visionaries the opportunity to get on center stage with the Who's Who of the plastics manufacturing industry from the region as well as experts from North America, Europe and China to give high-powered keynote addresses and engage in lively talks and panel discussions.

Join over 175 manufacturing professionals like you and deliver your message.

Reasons Why You Should Attend

Focus on Opportunities in 3 Important Sectors:

Packaging, Automotive, Consumer Electronics.

Face-To-Face Communication With Your Peers:

Meet industry authorities, fellow manufacturers, suppliers, regulators, distributors, academe as well as R&D researchers at the event.

Be Updated About The Latest Market Trends And Prospects:

Learn about regional manufacturing needs, export opportunities and more.

Learn From The Industry Experts:

Get ideas, gain insights and learn best practices in processing and design in the plastics industry.

Visit Exhibitors' Booths:

Discover new products, services and solutions for your business to generate higher profitability.

Meet New Suppliers And Agents:

Attend one-to-one meetings with potential partners not only from Indonesia but across the region.

Build Your Business Network:

Build your business network at a relaxing and friendly atmosphere.

Best Practices in Design, Materials, Molding, Processing and Testing

2017 ASIA Plastics Processing Technology & Innovative Materials Summit SPECIAL Activity

Factory Visit: PT Inter Aneka Lestari Kimia - Indonesian chemical and plastic products manufacturer

Visit **Inter Aneka Lestari Kimia, PT**, an award-winning company recognized by the Indonesian Government with “**Industry Technology Pioneer Award**”. Gain valuable information on Indonesian Bio-Plastics Trends and Solutions when you tour the company’s manufacturing plant. This FREE tour comes with registration in the 2017 Asia Plastics Processing Technology and Innovative Materials Application Summit on 6-7 September 2017 in Jakarta, Indonesia.

Place of visit—ENVIPLAST® Bio-based polymer factory

PT Inter Aneka Lestari Kimia’s bio-based polymer factory is located in Tangerang with a total area of 50,000 sqm and currently has a production capacity of 6,000 metric tons per annum which can be extended to 30,000 metric tons per annum.

This factory mainly produces “fully biodegradable cassava plastic bags” by using 40% cassava and 20% vegetable oil, under the trademark ENVIPLAST®. PT Inter Aneka Lestari Kimia is a well-known bio-plastic bag manufacturer in Indonesia and also one of the key suppliers for local department stores and retail outlets.

【About PT Inter Aneka Lestari Kimia】

Inter Aneka Lestari Kimia, PT was founded in 1985 to manufacture chemical products for building related purposes. In 1990, the masterbatch and polymer compound business division was established to serve the growing plastic industry in the country. The bio-polymer compound business unit along with its research and development division was established in 2006. In 2011 ENVIPLAST® was introduced to the market as environmental-friendly bio-based pellets and bags/film.

Inter Aneka Lestari Kimia, PT has proven itself as market leader and trend-setter in the building, chemicals and plastic industry. In addition to ISO 9001, OHSAS 18001, ISO 14001 certifications, the company has received several prestigious awards which highlights its commitment to quality management and innovation.

These events not only provide industry leaders with the latest technologies, but also help companies to innovatively explore new markets. With over 10 years' experience, Ringier Events has been successfully linking over 5,000 buyers and suppliers in China, Southeast Asia and the rest of the world to the mutual benefit of all parties.

Strong partners

4 key associations from Indonesia & S.E Asia will support our event and their members are invited to attend this event for deeper partnership.

§ INDONESIA PACKAGING FEDERATION (IPF)

IPF is a business association, nonprofit, non-governmental organization of packaging industry in Indonesia, founded in August 1977. The mission is to enhance packaging quality & technology development as well as to encourage research and development in the packaging innovations.

§ Indonesia Plastic Recycling Association (AIDUPI)

Indonesia Plastic Recycling Association(AIDUPI),established in 2015 in Surabaya, East Java (previously existed as AIDUPI) was founded by plastic recycler entrepreneur.

AIDUPI' s mission is to create conducive recycling business by cooperating with all the players involved and to promote the aspirations of members, improve the cooperation and communication between members and the Indonesian government. And AIDUPI' s vision is to become association that benefits the members and government through better environment program.

AIDUPI has 275 Members, including 120 members of finish good manufacturer & pelletizing processor and 145 members of flakes & chips producer, waste bank, and scavenger.

§ About PLASTINDIA FOUNDATION

Established in 1987, Plastindia Foundation is the apex body of major associations, organizations, and institutions connected with plastics, with common objectives to promote the development of the plastics industry and to assist the growth of plastics and related materials. The Foundation is dedicated towards national progress through plastics.

The key focus of the Foundation is to facilitate export led growth of the Indian plastic industry and help boost export business volumes and revenues. In line with that, the Foundation also focuses on helping India to become the preferred sourcing base of plastic products around the world.

§ Plastics Institute of Thailand (PITH)

Plastics Institute of Thailand (PITH) is the 8th industry specific institute under the supervision of Industrial Development Foundation, the Ministry of Industry. PITH has a long-term responsibility to collaborate with the government, academic and private sector to support Thai plastics industry. The institute receives government funding for projects management; and private sector supports budget for its internal operations. It' s principle and goals are to strengthen and drive Thai plastics industry toward sustainable development.

PITH aims to become a center of information, knowledge and collaboration among institutes, which will generate integration and operation to drive Thai plastics industry.
