

International Implantable and Interventional Medical Device Technology Application Conference 2017

27–28, July SUZHOU CHINA

Sponsors

CONFERENCE BACKGROUND

In the medical implant global market, North America accounted for the largest share of the market, followed by Europe. This is the progress of medical technology, the growing elderly population, chronic disease is more and more high prevalence, rising health care costs and health infrastructure improvement caused by the medical implant. The market in Asia is also expected in the next few years the rapid growth. The implant market China developed rapidly in the past 30 years, the past 10 years the average growth rate has been maintained at 15% to 30%, is expected in the next 10 years will continue to more than 10% growth rate.

China expects sales of medical materials market compound growth rate close to 30%, a conservative estimate of 2015 and 2020 annual sales of \$37 billion and \$135 billion 500 million respectively, to 2020 Chinese will grow into the world's second largest biomedical materials market, global market share will reach 22%.

2017 the 7th implantable and interventional medical devices emerging technology application summit will be held in July, will explore the cardiovascular department and orthopedics medical equipment, medical equipment, dental instruments, wearable implantable devices, hot point of common concern of medical polymer materials and equipment processing technology sensors and other issues, and divided into sessions of the orthopedics and dental devices and cardiovascular device, a grand scale, you can not miss!

Why Should You Attend

- 20+ topics, 150+ industry elites
- Advisory committee from domestic and overseas markets
- Market overview, Industry trends and innovative technology
- Industry experts to share onsite
- Access to practical idea, news and solutions and new ideas
- Mini expo and technical seminar
- Supply & demand matching
- Factory tour

WHO SHOULD ATTEND

By position

President / General Manager / CEO
Vice President / Deputy General Manager
Director / Deputy Director
R & D / Registration / Regulatory / Quality Department engineer
Purchasing Manager
Engineering / Project Management
Sales / Marketing / Business Development Manager

By industry

Medical device manufacturer
Medical raw material suppliers
Packaging material supplier
Machinery and equipment manufacturers
Testing and certification bodies
OEM
Government, associations and academic and research institutions
Others

HOT TOPICS

1. Marketing Trends

- Domestic and overseas medical device industry market analysis
- The orthopaedic implant instrument industry present situation and development trend
- The status quo and prospect of cardiovascular interventional devices

2. Regulation & Testing

- Innovative medical devices for special examination and approval of requirements
- Pay attention to how domestic new material products through domestic registration approval
- Medical apparatus and instruments of sterile barrier
- QA certification of implants & Interventional Materials medical devices

3. Product Design

- Frontier concept of non vascular type of minimally invasive technology and equipment
- R&D design and production of artificial joint for the Chinese market
- Cardiovascular devices product development design
- Research design and application cases of coronary stents

4. Innovation Materials

- New medical metal materials and its intervention equipment research and development status quo
- The innovation material of orthopaedic implant instrument research and application
- NiTi alloy material and its application
- Zinc alloy biodegradable material research and application progress
- Biodegradable magnesium alloy materials and biodegradable stent technology
- The latest research progress in medical coating material **(NEW!)**

5. Process Technology

- 3D-printing auxiliary role of cardiovascular intervention surgery **(NEW!)**
- Minimally invasive surgical instruments processing solutions **(NEW!)**
- Medical device packaging solutions
- 3D printing technology application and innovation in hard tissue surgery
- Processing technology of precision machining and forming college for heart stent catheter

6. Clinical applications

- Cardiovascular interventional clinical status and demand
- The status quo and requirements of clinical orthopaedic products
- The clinical application and requirements of dental medical devices
